

WHY YOU ARE BEING CALLED FOR TRAINING

What has happened in Europe has warned us that we must be prepared to defend Canada. We must be prepared not only to repel attacks upon our sea coasts, but through our northern forests and upon our prairies. For this war is not like other wars. Planes and parachutes make every part of our country vulnerable to attack and we must be ready to meet such an attack wherever it may be attempted here. We must build up, as quickly as we can, large trained masses of men, everywhere in Canada, so that no matter where we are suddenly called upon to defend ourselves we will have trained men there to do it.

Under the authority of the National Resources Mobilization Act, 1940, Canada is calling you to prepare yourself for that defence. You are one of a quarter of a million men who will be called for training within the next twelve months. It is not pretended that the short period you will spend in camp will make you a fully trained soldier but when you leave camp you will know how to handle firearms; you will know something of army routine and organization; how to behave in formation and, in general, some of the elementary rules of warfare.

You are not being called from just one section in Canada but from all sections, and so when you are trained you will be part of a great potential army scattered throughout this country and which Canada may mobilize rapidly and effectively to meet the threat of danger at any given point. And should you have to fight in defence of your home later you will be able to give a good account of yourself in battle. You must not regard this call to duty as something unworthy. It is the valiant test of citizenship and the supreme badge of honour.

WHAT TO BRING WITH YOU

All clothing and equipment during your training period will be supplied with the exception of the following articles of personal kit:—Brush and Comb, Braces, Soap and Towel, Shaving Kit, Tooth Brush and Boot Brush.
